SUMMARY

Junior Backend Developer focused on building reliable and scalable systems that solve real-world problems. Passionate about designing backend architectures that are efficient, maintainable, and capable of supporting growth and real-time interactions. Possesses a solid foundation in software engineering along with hands-on experience in developing APIs and data-driven applications. Continuously learning and refining skills to deliver high-quality backend solutions and contribute to meaningful products.

EXPERIENCE

Centr (E-Learning Platform) Aug 2026 - Present

Backend Engineer *Cairo, Egypt*

- Engineered core administrative systems, access control, and centralized logging infrastructure for the e-learning platform.
- Architected and implemented end-to-end CI/CD pipelines, automating testing, builds, and deployment workflows.
- Configured production servers and managed cloud deployment environments, ensuring system reliability and uptime.

EALB (Egyptian Arab Land Bank) Jul 2025 - Aug 2025

Intern *Giza, Egypt*

- Gained hands-on experience with core banking systems, focusing on database security, data integrity, and access control.
- Collaborated with IT and cross-functional teams to resolve system and compatibility issues.

EDUCATION

ElShorouk Academy Sep 2022 - Aug 2026

Bachelor's Degree in Computer Science GPA: 4.0 *Cairo*

SKILLS

Programming Languages: C# | C++ | JavaScript | TypeScript | Python | SQL | Rust | HTML | CSS
Frameworks & Libraries: NodeJs | Express | RESTful Services
Databases: Microsoft SQL Server | MySQL | Postgres | MongoDB
Tools & Platforms: Git | GitHub | GitLab
Concepts & Methodologies: Object-Oriented Programming (OOP) | Software Development Life Cycle (SDLC) | Agile | CI/CD
Artificial Intelligence: GenAI | AI-powered tools
Soft Skills: Problem-solving | Debugging | Performance Optimization | Teamwork | Communication | Adaptability | Time Management | Critical Thinking

PROJECTS

AmpliCV Mar 2026

- Built a full-featured backend system for creating and managing multiple resumes with customizable sections, now ready for public launch.
- Implemented LaTeX-based PDF generation for ATS-friendly resumes, enabling users to produce professional documents instantly.
- Developed job tracking features (status, notes, resume linking) that assist users in managing their applications efficiently.
- Integrated AI suggestions that help users improve resumes and match jobs, enhancing user experience.
- Designed scalable APIs using a clean controller-service architecture to support a growing user base.
- Created an AI-powered chat agent that interacts with users to dynamically update and tailor their resumes, further assisting them throughout the job-search process.

FixPay Nov 2025

- Led the development of an on-demand service platform connecting customers with verified freelance workers for home services.

- Implemented task creation, offer submission, and selection workflow enabling customers to compare multiple offers based on cost, ratings, and experience.
- Designed and integrated verification system for worker identities and a rating/review mechanism to ensure trust and safety.
- Developed real-time notifications, transparent pricing, and secure payment handling across web and mobile applications.
- Utilized modern back-end technologies (Node.js, Express) and database schema design to support business processes.

Huffman Compression Tool Jan 2024

- Developed a high-performance Huffman Coding tool, achieving up to 40% lossless file compression and 30% faster encoding/decoding through optimized data structures.
- Ensured 100% data integrity for both text and image files using efficient algorithm design and a robust tree-building technique.

COURSES

Backend Using .NET Jun 2024

DEPI (Digital Egypt Pioneers Initiative)

- Completed intensive backend development training with ASP.NET Core MVC, building full-stack projects, APIs, and databases, while advancing skills in C#, JavaScript, SQL, and software development best practices.
